equipment**

*The Corghi product line provides unmatched capability to address the challenges of changing run-flat, ultra-high performance and PAX tires for every service and price level.*

### **AM26 Artiglio Master Tire Service Center**

Computerized operation and automatic mount/demount procedures finish the job quickly and safely. Eliminates tire and wheel damage for wheel diameters from 12"-26".

### **EM8070 QL Zero Tolerance Wheel Balancer**

Delivers unmatched accuracy and multiple programs for all passenger, light truck and motorcycle balance requirements. Radial runout capable with available options.

### **A2024TI-2015 Tilt-Tower Tire Changer**

Our best wheel clamp changer with power assist and versatile assist arm. Pneumatic locking mount/demount head avoids metal-to-metal contact with the rim. Services wheels from 10"-24" diameter.

### **EM8540 QL Zero Tolerance Wheel Balancer**

Provides all of the same balance features as our EM8070 QL unit plus pneumatic quick-lock capability.

### **A9824TI-1500 Swing-Arm Tire Changer**

A9824 series tire changer is the most powerful and fastest in the industry. Approved for run-flat, high performance and PAX tires, unit services wheels up to 24" diameter.

### **EM8540 Zero Tolerance Wheel Balancer**

Provides all of the unique Corghi balance features at a most affordable price. Pneumatic quick-lock capability is available as an option.

### **A9220TI-1500 Swing-Arm Tire Changer**

Includes PU1500 power assist unit and services wheels up to 20" diameter with speed, precision and safety. Teamed with the EM43 balancer, this duo is our most affordable combination.

### **EM43 Zero Tolerance Wheel Balancer**

Low-spin EM43 balancer does not require a hood. Accommodates assemblies up to 144 lbs. and can be operated on 110v or 12v DC. Includes all Corghi balance programs.
