

Bridgestone opens huge Select tyre centre in SA

What is believed to be the largest truck tyre centre in the Southern Hemisphere has just opened its doors in Adelaide's northern suburbs.

The Bridgestone Select site, on the corners of Hanson and Cormack Roads at Wingfield covers more than 15,000m² and offers seven dedicated B-double work bays.

State manager, Anthony Hill, said considerable planning had gone into the design of the facility.

The new Bridgestone Select site, on the corners of Hanson and Cormack Roads at Wingfield in Adelaide's northern suburbs covers more than 15,000m² and offers seven dedicated B-double work bays.

Bridgestone's state manager, Anthony Hill, says considerable planning had gone into the design of the new Bridgestone Select outlet.

"Because we can cater for all sizes of trucks up to and including road trains, we put a lot of work into ensuring access to the site is easy for all trucks," he said.

"All of our bays are totally under cover and offer convenience without the hassle of

uncoupling. There is no question that, with this facility, we can now maximise speed of operation and minimise down-time for drivers."

All airlines are installed in-ground and service equipment is based at both ends of the facility ensuring optimum working

WILL TURN YOUR WORLD UPSIDE DOWN THIS CORGHI TYRE CHANGER

No, we're not kidding. Once you try the new Corghi Artiglio 50 you won't want to work with any other machine. Here's why!

- **Does your current Tyre Changer handle up to 30" wheels?**
✓ The Corghi Artiglio 50 takes car, 4WD and light truck wheels from 12" right up to 30".
- **Do you have problems changing Low Profile & Run Flat tyres?**
✓ The Corghi Artiglio 50 easily handles these and only requires one person to work the machine.
- **Do you find that you damage wheel rims?**
✓ The Corghi Artiglio 50 does not require tyre levers and handles expensive alloys with kid gloves (i.e. no scratches or marks).
- **Would you like to speed up the amount of time it takes to change tyres?**
✓ The Corghi Artiglio 50 is 50% faster than ordinary tyre changers thanks to the new single-arm bead breaker. Faster turnaround means increased productivity.
- **Do you find it an effort to change more difficult tyres?**
✓ The Corghi Artiglio 50 saves your back by mounting the wheel via a special lifting cradle (a first for a mid range model). Automatic operation.

New wheel equipment option for tyre outlets

Australian repairers now have a new option when looking for quality tyre changing and wheel balancing equipment.

According to TRS Tyre and Wheel Pty. Ltd. it is the new Australian distributor of Sice automotive wheel equipment.

The company, New Zealand's largest supplier of agricultural and industrial wheels, has established a base in Melbourne and in addition to the Sice range, offers a full range of agricultural and industrial wheel solutions.

A well recognised brand worldwide, Sice equipment has been sold in Australia since 1988. The Sice company is based at Correggio in Northern Italy and supplies manual control, semi automatic and fully automatic tyre changers, wheel balancers, aligners and platform lifters to over 80 countries.

TRS says Sice has a high level of research and development producing a reliable hi-tech product range, "rated among the best quality available by the automotive sector's leading firms".

TRS, also the New Zealand distributors for Sice, carries a full range of car, truck and motorbike tyre changers and wheel balancers as well as lifting platforms.

Some of the larger truck and bus wheel changers suit heavy agricultural tyres whilst the electronic computerised wheel balancers feature a highly visible 15" (38mm) monitor.

Daniel Dunn, Australian product manager for TRS tells more.

"In addition to the machines we also stock a comprehensive range of replacement parts and accessories and are committed to supporting the sale, installation and servicing needs of our clients nationally."

There's a full 12 month manufacturer's warranty on new machines, "and better still we will trade in older machines in

TRS is the new Australian distributor of Sice wheel service equipment.

reasonable working condition, regardless of brand," Daniel adds.

"To further improve our product support and market share we are looking to appoint some regional sub distributors," Daniel also revealed.

"We are particularly looking for high profile sales orientated businesses with a

proven service reputation to become regional distributors for the entire Sice product range."

TRS Melbourne facility is located at 4A Silvertown Close, Laverton North, Vic., phone 1800 127 807. For distributorship enquiries contact Daniel on 0406 696 220.

New Bosch brake pad catalogue

Bosch has released its 2007/2008 Brake Pad Catalogue. It lists more than 80 new part numbers, and Bosch says its brake pad range now covers more than 90% of Australian vehicle population.

The company emphasises that choosing the correct brake pads for a customer's vehicle and driving style is vital to achieve the shortest braking distance and to prevent annoying noises and vibrations.

It urges service shops to choose Bosch brake pads, "the No. 1 in Braking Systems worldwide. When it comes to safety, Bosch makes no compromise in quality and comfort".

The new brake pad catalogue is available from your local distributor or Bosch sales representative.
